On Prepaid Unlimited plans, customers are never “throttled”. That is, data usage is never reduced to such a low speed that a customer cannot use data for normal purposes (e.g., web browsing, email, maybe light streaming). Depending on the plan, AT&T may temporarily slow the customer’s data speed: (1) at any time during periods of network congestion or (2) if the network is congested after the customer has used 22GB of data during a monthly cycle. The specific applicable policy is disclosed for each unlimited plan. Mexico and Canada roaming may be reduced to 2G speeds.
